# Acknowledge

As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a projectimplementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. laddered approach.
- ✓ Build a larger more robust application
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

eside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knowledge in web developing world.

We also thank you so much for your infomation and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 06.

# Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website (in this project) is a tool that brings everything in the world to you such as historic monuments information natural knowledge or skill in technology...

This project is our first stepping stone, will we be able to continue with the more difficult parts behind or will we give up halfway.

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back [eprojects@aptech.ac.in](mailto:eprojects@aptech.ac.in) as the assigned schedule.

## Problem Definition

The website is to be developed based on the following specifications:

### 1.Home Page Design:

- Utilize sections for the Home Page with an appropriate logo.
- Include a header section showcasing images of related products.

### 2.Navigation Links:

- Incorporate navigation links to seamlessly move through various categories of information.

### 3. Menu Categories:

- Create a menu featuring categories of all products.
- Anticipated product categories include Cameras, Camera Lenses, Pro Audio, Memory Cards & Media, Tripods & Supports, Lighting & Studio, Camera Bags & Cases, and Miscellaneous Accessories.
- The list can be expanded to include more products.

### 4.Information Display:

- Provide options for a brief introduction about the diverse range of products.
- Include details such as the shop's location and any other relevant information.

### 5.Brand-based Categorization:

- Categorize information based on product brands.

- Users should be able to click on a link/button/menu to view products specific to a particular brand.

#### **6.Product Selection:**

- Upon selecting a brand, display a list of products associated with that brand.

#### **7.Product Features:**

- Present a brief summary of product features along with pictures on the webpage.
- Detailed features will be stored in individual Word documents, which users can download or view.

#### **8.Product Comparison:**

- Enable users to compare various products from different or similar brands.

#### **9.Contact Us Page:**

- Create a "Contact Us" page with the company's address displayed using GeoLocation API (e.g., Google Maps).
- Include an email address that, when clicked, invokes the local mail client for users to send emails.

## Customer Requirements Specifications

### User:

#### Input:

- Product to choose
- Member registration data
- Add to cart

#### Process:

- Search product information
- Check the registration information successfully
- Check cart

#### Output:

- Information about the selected product
- Notification of successfull / failed registration
- Notification added successfully and can pay
